PROFESSIONAL SUMMARY

Python Developer Intern at WhiteLotus Corporation with a B.Tech in Computer Engineering (2026, CGPA 8.84). Experience building FastAPI microservices with JWT authentication, PostgreSQL, Redis, RabbitMQ and Celery, and LLM-based document search and chat. Seeking Python Backend Developer, FastAPI Developer or AI Application Developer roles.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript
Backend: FastAPI, REST APIs, Microservices Architecture, JWT Authentication, Pydantic, pytest
Databases and Messaging: PostgreSQL, SQLite, SQLAlchemy, Alembic, Redis, RabbitMQ, Celery
AI Applications: LLM-based applications, Retrieval-Augmented Generation (RAG), FAISS, Gemini API
Tools: Git, GitHub, Docker, Docker Compose, VS Code, HTML, CSS

EXPERIENCE

Python Developer Intern | WhiteLotus Corporation | June 2026 - Present

- Worked on the AI Document Analysis Platform, a five-service FastAPI backend with JWT authentication, PostgreSQL, Redis, RabbitMQ and Celery.
- Contributing to development of an AI-agent-based product using Python and backend engineering (in progress; company project, details confidential).

Python Fullstack Developer Intern | Qspiders (Training Institute), Ahmedabad | Dec 2025 - Jun 2026

- Completed Python Full Stack training covering frontend and backend fundamentals.
- Practised Python core concepts including OOP, data types, loops and functions.
- Built responsive web pages with HTML, CSS and JavaScript and learned basic frontend-backend integration.

PROJECTS

AI Document Analysis Platform | github.com/akshitthakkar/Ai-Document-Analysis
Python, FastAPI, PostgreSQL, Redis, RabbitMQ, Celery, Docker Compose, FAISS, Gemini API

- Designed a microservices backend with separate gateway, auth, document, chat and AI-worker services communicating over REST.
- Implemented stateless JWT authentication: a dedicated auth service issues tokens and every other service verifies them locally.
- Built PDF upload and processing endpoints with PostgreSQL storage and background embedding jobs using Celery and RabbitMQ.
- Used Redis for caching, session storage and API rate limiting; used Docker Compose for PostgreSQL, Redis and RabbitMQ.
- Worked with the retrieval-based document search and chat module that generates answers with an LLM.

Domino's Food Ordering System | github.com/akshitthakkar/Dominos-Food-Ordering-System
Python, SQL, SQLite

- Built a Python Domino's-style ordering application with user authentication and menu management.
- Implemented signup and login with SQLite for storing user credentials.
- Enabled numbered item selection, a cart and automatic bill calculation using OOP, loops, dictionaries and database handling.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Engineering | 2022 - 2026
Silver Oak Institute of Technology, Ahmedabad | CGPA: 8.84

Higher Secondary Certificate (HSC) | 2020 - 2022
Puna International School, Ahmedabad | 77%

LANGUAGES

English, Hindi, Gujarati
