CAREER OBJECTIVE

Enthusiastic and detail-oriented Computer Engineering graduate with a passion for web development and building real-world tech solutions. Eager to apply technical skills and creative thinking to contribute effectively to a progressive organization.

EDUCATION

Silver Oak Institute of Technology — *Ahmedabad, India*
Bachelor of Technology (B.Tech) in Computer Engineering — CGPA: 8.84 — *2022 – 2026*

Puna International School — *Ahmedabad, India*
HSC — Percentage: 77% — *2020 – 2022*

TECHNICAL SKILLS

Languages: Python
Web Technologies: HTML, CSS, JavaScript, REST APIs
Backend & Frameworks: FastAPI, Microservices Architecture, JWT Authentication, Pydantic
Databases & Messaging: SQL, PostgreSQL, Redis, RabbitMQ, Celery
Developer Tools: VS Code, Git, GitHub, Docker

PROJECTS

1. AI Document Analysis Platform | Technologies Used: Python, FastAPI, PostgreSQL, Redis, RabbitMQ, Celery, Docker
GitHub: github.com/akshitthakkar/Ai-Document-Analysis

- Designed a microservices-based backend with separate services for authentication, document handling, and an API gateway, communicating over REST.
- Implemented a stateless JWT authentication system, with tokens issued by a dedicated auth service and verified independently by each other service.
- Built document upload and processing endpoints with PostgreSQL for storage and background task queuing via Celery and RabbitMQ.
- Used Redis for caching, session storage, and API rate limiting across services.
- Containerized all services with Docker and Docker Compose for consistent local setup and deployment.
- Worked with a document search and chat module that retrieves relevant content and generates responses using an LLM.

2. Dominos Food Ordering System | Technologies Used: Python, SQL, HTML, CSS, Tailwind CSS
GitHub: github.com/akshitthakkar/Dominos-Food-Ordering-System

- Built a Python-based Dominos-style food ordering application with user authentication and menu management.
- Worked on the frontend using HTML, CSS, and Tailwind CSS to design clean and responsive pages.
- Implemented user signup and login system using SQLite for securely storing user credentials.
- Enabled users to select items by number, add them to a cart, and compute the final bill automatically.
- Used Python concepts such as OOP (classes/objects), loops, dictionaries, data mapping, and file/database handling.

INTERNSHIP

Qspiders (A Software Training Institute) — *Ahmedabad, Gujarat*
Python Fullstack Developer Intern — *Dec 2025 – Present*

- Currently undergoing training in Python Full Stack Development, covering frontend and backend fundamentals.
- Learning Python core concepts including OOPs, data types, looping statements, and functions with hands-on practice.
- Practicing HTML, CSS, and JavaScript to build structured and responsive web pages.
- Developing understanding of web application flow and basic frontend–backend integration concepts.
